

Re: Broadband over Power Lines (BPL)

As a licensed Amatuer Radio Operator for more than twenty three years, I would like to support the ARRL position on BPL.

Please consider the damage BPL would do to Ham Radio and several other services that utilize HF frequencies, with the overwhelming RF pollution it generates. I understand that the federal government is under enormous pressure to make universal broadband Internet access a reality, and BPL is the only system that shows any potential for delivering this in the near future.

Thank you,
